

THE ADAPTIDRY

The Adaptidry achieves high efficiency by dispersing intense drying power simultaneously to multiple areas around the room.

Creates more pressure or vacuum suction within walls and without drilling holes, making it more effective than other vent systems. Also great for drying out sleepered floors (sport courts and gymnasiums). Can be used in a push - pull setup. When used with a HEPA air scrubber it becomes a true HEPA filtration system. The ADP9 as packaged will dry 22 linear feet, and the ADP5 will dry 12 linear feet (based on back to back placement of Wall Vents). When leaving 1 foot between Wall Vents, ADP9 will dry 32 linear feet, and the ADP5 will dry 18 linear feet.

The ADP5 & ADP9 fit 12", 14", 16" & 18" rings: Axial fans, MAX Force, Air Wolf, Phoenix Guardian HEPA, Abatement Technologies 1800 & 2400 Air Scrubbers and others.
