GANN - ADVANCED METERS

PART #	DESCRIPTION	STATUS	MSRP	QTY
G1550	UNI - 2 Base Only The UNI 2 is an electronic & universal triple measuring instrument. A large range of GANN (active) electrodes can be connected with this device. Structural moisture, air humidity & temperature can be measured. See the UNI2 accessories section for all options. Readings are on scale of 0-200 and or in % of moisture content depending on accessory used.	S	\$ 559	EA

Replacement Parts Pages

PART #	DESCRIPTION	STATUS	MSRP	QTY
G1670	RTU-600 Base Only Electronic four functions in one meter for measuring wood moisture, structural moisture, air humidity & temperature with digital LCD readout, adjustable temp compensation for wood temp between 14- 176°F. Precise correction ability for all wood species. Connects to B 50, B 60, MB 35, RH-T37 & all accessories. B 50 & 60 read accurately down 4.75". Readings are on scale of 0-200 and or in % of moisture content depending on accessory used.	S	\$ 1,085	EA

Replacement Parts Pages

PART #	DESCRIPTION	STATUS	MSRP	QTY
G1400	M 4050 Base Only Measures moisture content of building materials like the RTU 600, but also stores data, interfaces with a PC, memorized calibration curves for 250 species of wood. Approved by the FMPA testing institute for use in licensed bonded-wood industry. Same automatic temperature compensation. Connects to all accessories. Readings are on scale of 0-200 and or in % of moisture content depending on accessory used.	SO	\$ 1,799	EA
